The final EIR concluded that... the MP 2035 would result in the following unavoidable significant adverse impacts that are not able to be mitigated to a less-than-significant level: transportation (circulation, neighborhood intrusion, congestion management plan and emergency access); noise and vibration (excessive noise from buses and permanent noise increase from buses); and biological resources (sensitive species/habitats, Wetlands).
- h. Discussion and possible action to discuss current design standards and design characteristics of the SORO neighborhoods and how those design elements will be affected by current development design elements that conflict with the SORO neighborhoods unique, non-suburban garden-style housing that represents the eastern side of West Los Angeles.
