Dear Members of the Los Angeles City Council,

The South Robertson Neighborhoods Council (SORO NC) strongly advocates for the immediate reinstatement and expansion of Los Angeles Municipal Code 85.02. - The unregulated proliferation of vehicle dwellings presents an unacceptable threat to the public safety, sanitation, and economic stability of our community.

To restore civic order, we demand a renewed ordinance that explicitly mandates the following:

- **Expanded Buffer Zones:** Strict prohibitions on vehicle dwelling adjacent to residential neighborhoods and active commercial corridors to protect local businesses and private property.
- **Rigorous Sanitation Penalties:** Severe, immediate consequences for the illegal discharge of biohazardous waste and greywater onto public streets.
- **Unambiguous Enforcement:** Clear directives empowering the Los Angeles Police Department and the Department of Transportation to swiftly tow violators and dismantle encampments.
- **Equally Strict Enforcement of Existing Parking Regulations:** Rigorous enforcement of standard parking maximums to ensure the continuous turnover of public spaces.

The City Council must act decisively to uphold the rule of law and protect the dignity of our neighborhoods. We expect your immediate action on this critical matter.

Respectfully submitted,

Michael Lynn
President
South Robertson Neighborhoods Council
