

Help Us Spread the Word!

Free Flume Smart Water & Leak Detector for LADWP Customers

As summer temperatures rise, so do water usage and utility bills. Running sprinklers, watering trees and plants, and filling swimming pools add up and can lead to hidden leaks and unexpected costs. To help LADWP single-family residential customers take control of their water use and bill, we are offering a special rebate for a **FREE** Flume Smart Home Water & Leak Detector device—part of our commitment to providing customers with resources to manage their utility costs efficiently.

Limited-Time Offer: June 9 – July 4, 2025 – LADWP customers can order Flume for **free** (\$249 retail value). At checkout, they pay **\$25 plus shipping and tax**, but after installation, **the \$25 is automatically refunded** to their credit card, making the total cost **\$0 after refund** (excluding shipping and tax).

Installing Flume is quick and easy—it attaches to the water meter in just 10 minutes and immediately starts tracking water usage and detecting leaks before they become costly problems.

Providing Flume at no cost is just one of the many ways LADWP is committed to supporting our customers with smart solutions to better manage utility costs and conserve resources.

We greatly appreciate your help in spreading the word about this special summer offer. To support outreach, we've provided social media posts and a 7" x 5" digital handout that can be printed or shared online.
